# INSTRUCTIONS FOR THE NEW YORK STATE UNIFORM HAZARDOUS WASTE MANIFEST

## General Information

New York State regulation requires proper completion of all information on a manifest. Omissions, false coding or illegibility is considered a violation. All generators are responsible under New York State and Federal Law for the proper identification, labeling, manifesting and ultimate disposal of all hazardous waste they generate. The manifest system is designed to track hazardous waste from the point of generation until its final disposal (cradle to grave). In order to accomplish this goal, it is essential that all items on a manifest be properly completed.

## Distribution

Distribution of each copy of the manifest is indicated on the bottom of the form. Copies of the manifest must be mailed promptly. New York State regulations provide five (5) working days for generator and two (2) for a TSDF. The Disposer's state is the state in which the designated TSD facility is located. Generator's state is the state in which the installation generating the hazardous waste is located. TSD facility is a treatment, storage or disposal facility.

## Generator Section

**Item 1-**Enter the US EPA ID number (twelve digit number issued by the federal government). The generator must assign a sequential unique, five digit number different for each manifest, as the manifest number.

**Item 2-**If a continuation sheet is used, please enter the total number of sheets here. Any EPA approved continuation sheet may be used, but distribution and completion must meet New York manifest requirements. The document number in Item A must be placed in Item L of each continuation sheet.

**Item 3 and 4-**Self explanatory. These must correspond to the generators US EPA ID number.

**Items 5, 6, 7 and 8-**These are self explanatory. These numbers must be secured from the transporter. If more than one transporter is used, the generator must supply additional copies of this manifest (copy #5) for each transporter.

**Items 9 and 10-**The designated TSD facility, name, address and ID number should appear here.

**NOTE:** All US EPA ID numbers are a twelve digit code starting off with the letters corresponding to the state in which the facility or transporter is located.

**NOTE:** Only New York State authorized transporters and TSD facilities are allowed to transport or receive hazardous waste in New York State. The generator shall check for authorization.

**Item 11-**USDOT requires the word "waste" before or in the shipping name for all hazardous waste. See 49 CFR 171 thru 177. Contact USDOT office for description assistance. Any waste in this box is a considered hazardous waste.

2. There may be variations in the requirements between various states regarding items A thru K, therefore, the generator should contact the disposer's State for specific details.
